

**IN THE SPECIFICATION:**

Please amend the specification as follows:

Page 6, line 20, delete "resistor" and insert therefor --register--.

Page 9, line 24, delete "rgwz" and insert therefor --RGWZ--.

**IN THE CLAIMS:**

Please amend the claims as follows:

1. (Amended) A semiconductor device which allows an input signal thereto to select one of N operation modes, and operates in said one of N operation modes, said semiconductor device comprising:

a' a selection circuit for selecting an operation mode from said N operation modes when said input signal indicates said operation mode, and for selecting a predetermined operation mode from said N operation modes when said input signal is an undefined signal indicating none of said N operation modes; and

an internal circuit operating in one of said [an] operation mode and said predetermined operation mode selected by said selection circuit,

wherein selection of said predetermined operation mode prevents malfunction of said internal circuit when said input signal is said undefined signal.

[ Claim 2, line 9, after "said", insert --predetermined--.

a2 5. (Amended) A semiconductor device which allows an input signal thereto to select
